

Note: This bulletin is excerpted from 21st Century New Public Series 16 The Exact Spiritual Pathway from Disintegration, Poverty and Sadness to Wholeness, Prosperity and Happiness and the Destructive Barrier and Consequences of “An Episode of Abuse” which should be studied for a full comprehension of these 29 steps. The purpose of this excerpt is to lay out the suggested processes that could be used to handle each step as you bring a client upward through an area of abuse.

As your client progresses upward through an area of abuse they may need to run each process listed at each step, or only some or one of the processes before they move to the next step. They may need to handle each step or they may skip steps, and at some point they will jump from the step they are handling to step 29. At this point you must process them from the top (step 29) down to the step they jumped from.

At that point they are done handling that area of abuse.

THE 29 VITAL UPWARD STEPS OF TIME AND LIFE SEQUENCES LEADING THROUGH THE HANDLING OF THE ABUSE EPISODE PHENOMENA AND ABOVE

The most extreme level is denial, doesn't know they do not know, they are so overwhelmed and in such pain that they cannot even face up to the fact something is very wrong in an area.

The most common way a being handles denial is to engage in the tacit sabotage action of burying themselves amongst those who are playing the same game of being into the same denials. “Birds of a feather flocking together” phenomena.

For a client to want to get something handled, they must have something they know they really want to get handled.

Therefore the first step is profiling the client. This will bring to view the following:

1. AN EXTREME BAD CONDITION OR LOW LEVEL OF EXISTENCE.
