

2-26-24 PRESENTATION COMPOSITE

My offered description to Gerri of my presentation:

During last week's dialogue on the theme of *Empaths and Highly Sensitive People-A Safe Space*, Roger asked the question, "Had anyone catalogued or listed their spiritual abilities and powers such that they could address them for improvement?"

Seeing this was of interest, I invited Roger to introduce what he has found in the seventy-plus years of delving into this subject as a basis of this week's topic of discussion.

Getting to know your true Spiritual Presence, powers, abilities and faculties such that they can be exercised and developed for more ease of accurate and knowing use.

Roger's journey began as an Australian surf swimming champion and member of the research team run by Forbes Carlile, then on Sydney University Faculty, but later the famed Olympic Swim Team Coach honoured by the Queen.

When Roger won his Gold Medal in 1954, his view of "*life*" was that it was mechanistic, and performance depended on training harder and feeding the body more and better nutrients. This too was Forbes's view, though they did dabble in hypnosis and a little "psychology."

In addition to swimming six miles a day in training, Roger independently investigated the various subjects available in the 1950's that claimed wisdom and knowledge of the "mental and spiritual realms" that might be used to improve his athletic performance.

Forbes did not agree with any of these woo-woo subjects. He was simply the mechanistic scientism man of the day.

None-the-less, Roger continued researching the "woo-woo," testing and practicing their prescribed drills and techniques, and in 1957 he experienced a mind-blowing ascension that proved to him that he was indeed Spiritual in nature with an array of Spiritual capacities.

For Roger, the premise and whole orientation of his research was based on the principle of WHAT WORKS. That is, his was not an issue pursuing theories, beliefs or others' "clever-think" propositions . . . it was strictly an issue of *applying* observed phenomena and principles and observing outcomes.

Since then, his research has continued. In 1977 Roger discovered that the physical universe of Matter, Energy, Space and Time is not the Be-All-and-End-All of existence.

He discovered that there is existence PRIOR to the current physical universe. At the time it appeared there were THREE domains of temporal existence before the physical universe was brought into existence by us . . . since then, a number more have been articulated by him and his colleagues.

But most important in his view, is the discovery, articulation and defining of our Primal Spiritual Native State. It was this condition of existence, in all of its purity that practiced co-existence and loving co-empowerment such that the composite of the Beings involved were able to operate as though ONE INFINITE PRESENCE.

It was in our departure from this unity that we postulated future time that led to our decline into the located condition, we now find ourselves in, entrapped by unpleasant experiences of our past.

Roger and his team have found that this decline can be undone.

11-15-2023 OBSERVATIONS ON BASIC ABILITIES

As I address the questions I see raised above on this VITAL BASIC PROCESSES thread, I am also viewing a webinar with the “Sage on the Stage” being a “Change Agent” psychologist-therapist PhD type telling folks “*what truth is*”

Of course, “truth is” what is experienced from the effect point perspective according to these guys fixated on what “what ails ya” . . . in my observation, nothing I’ve seen from them is taken from the observation of one’s applied abilities and powers or causation!

So, to resolve the conundrums I see expressed above on this thread, I would direct your attention to observing, empowering and perfecting the application of your basic POWERS, ABILITIES, FACULTIES and VIRTUES.

BEING AT CAUSE IN ANY SITUATION YOU FIND YOURSELF IN REQUIRES THAT!

As a rule of thumb off of the top of my head right now, I would say these are the Powers, Abilities and Capacities I put attention on in order of priority . . . as I did in 1963 when I found myself suddenly without my body to operate with or via.

1. KNOW, EXPERIENCE AND VALIDATE THAT I AM. (Ummm, *the* basic omitted for many!)
2. KNOW WHERE I AM (can include *when*)
3. KNOW WHAT MY BASIC FACULTIES, ABILITIES AND POWERS ARE THAT CAN BE DEPLOYED TO CONTROL AND AFFECT WHAT I AM EXPERIENCING AND IN A RELATIONSHIP WITH.
 - a) Establish control of AWARENESS and ability to direct it as ATTENTION.
 - b) Recognize and practice my ability to place within my awareness my envisioned wants
 - c) Practice my ability to influence other Beings I am able to relate with to be in agreement with co-empowering my projected wants
 - d) Validate and honor these co-empowerments.
4. RECOVER AND PRACTICE THE ABILITY TO CHANGE MY LOCATION OF PRESENCE, AWARENESS AND BEING.

In reading the notes so far on this thread along with the questions I've received in emails in the last few days, what I have concluded is as follows.

What I observe is new folks who wonder how or if they will be able to solo process is that they are sitting on a by-passed gradient of ability . . . and that is, they have not done the drills to learn that they do and can DIRECT THEIR AWARENESS AND ATTENTION FULLY UNDER THEIR KNOWING CONTROL.

You old-timer members here know I discovered and wrote the definition of *attention* as: "*directed awareness.*"

We old timers learned control of our "attention" and awareness doing hours upon hours of Training Routine Zero.

You guys don't need to torture yourselves with that . . .

In ASCENSIONISM we have a very basic, basic drill or process to put your attention (awareness) under your full knowing control.

In fact, short of you being processed by a professional processor to address some emergency situation or another, PRESENCE PROCESS NUMBER ONE is the very first thing you need to do to sort yourself out and know a) that you are, b) where you are, c) that you can and do have control of your awareness and attention.

If you know or believe you are a Spiritual Being, use the command: "AS A SPIRITUAL BEING, BE PRESENT" . . . otherwise, just tell the client (you yourself) "BE PRESENT."

It's good and best if you have a partner . . . if not, you can do this solo!!!!

If solo, find an up-market location in a building like a 5 star hotel lobby or restaurant . . . otherwise, get out in nature among the trees or a nice well kept park.

Make yourself comfortable as you give yourself the above command, and commune with the uplifting environment.

In many respects, this is rather similar to my swim training (6 miles a day) where I was totally concentrated on *directing* my attention and awareness on my bodily performance . . . top athletes develop a colossal capacity for awareness and attention control, and of being able to be knowingly present, because of these hours spent controlling and directing these basic spiritual abilities (even if they don't know it was a spiritual ability/power).

So what can (and often does) happen when you do the Presence Process?

Firstly the thing to know is that you are reversing the NEGATIVE of having ever backed-off and gone unaware in the presence of what you in some earlier time DID NOT WANT TO EXPERIENCE.

And what can happen, is the old earlier, backed off from and failed to control not-wanted-experience can "turn on" . . . these experiences can be whatever you can imagine . . . don't be surprised. Drowsiness and "dope-off" is common . . .

If working with a twin, who should observe your change, or otherwise runs the process, of checking every 10 minutes or so: "Do you have any unpleasant sensation or mood? Unawareness or dope off you've experienced?" If no . . . tell the client: "Continue being present."

If there has been any turn on of any low mood, unpleasant sensation, discomfort or embarrassment, get it labelled and run:
"From where could a Spiritual Being experience (stated mood/unpleasant sensation, etc.)
Acknowledge each answer.

Repeat to a win, realization or upgraded condition of the client.

Next run: "From where could a Spiritual Being CREATE (stated mood/unpleasant sensation, etc.) Acknowledge each answer . . .

Repeat to a win, realization or upgraded condition of the client.

Note that "EXPERIENCE AND CREATE" are the two basic relationships you can have regarding any condition of existence.

OK this brief note will do for now.

Rog

CAUSE VERSUS EFFECT IN RESEARCH AND ANALYSIS

There are two possible addresses to resolving the conundrum of “Consciousness” versus the “Mechanical Universe.”

One is to study, analyze and ruminate on what one is experiencing and effect of when addressing the physical universe. Historically, this has usually been done from the perspective of being an effect point of what has been brought into existence by “an unknown source.”

The second approach is to address and to determine who and what is the “consciousness” that is referred to and presumed to exist and to delineate what its powers, abilities and capacities are that could be or are deployed by it to source and affect what it is we experience of the physical, mechanical universe. This is the analysis of causation approach.

I have found that the analysis and experiencing of causation and the perception of what I and we produce as active creators of the Physical Universe has yielded testably accurate and provably correct answers.

In essence, one can observe that trying to unravel the “mysteries” of the physical universe and our relationship to it by ruminating on the effects the physical has on us only has led to a cul-de-sac. Whereas, the action of elucidating what the causative capacities and creative actions of our Spiritual Presence is, leads to an understanding of *who*, *how* and the *what* of the causation that brought the physical into existence.

Many in the scientific and on-line guru communities use the term “Consciousness” without defining it and often with no understanding of what it actually is or is not. It is alluded that we do or should understand what “it” is.

An example of this fact is observed in the YouTube posted recording when Deepak Chopra asked an assembled panel of experts the question: “What is Consciousness?”

https://www.youtube.com/watch?v=Vkwa_s2zMAQ

Deepak Chopra embarrasses himself and guests on “Consciousness.”

It was Socrates that is reported to have said that, “A definition of terms is necessary to the gaining of wisdom,” or that, “the beginning of wisdom is in the definition of terms.”

Rather than looking to what is it that *is* conscious, the academics have added the suffix “-ness” to the basic faculty and ability we all have of the word “conscious,” as in “the man is now conscious and aware.”

It is most instructive to do an on-line search for the definitions of these two words: consciousness and conscious. Nowhere do we find it referred to as being a “thing,” as for example: man, mind, car or a horse.

Yet the science community continues to use the term to allude to *consciousness* as being a **thing** that is present and doing something.

Our observation is that what is present and is the causative element of existence being referred to is a Spiritual Presence of definable characteristics and capacities.

Indeed, this exchange between one of my research colleagues and myself delineates the situation rather nicely. We often exchanged research "notes."

The word "Spirita" is defined as a quantity of spiritual presence that is not involved in any relationship or activity, and is thus utterly free and pure.

Subject: **NEW AXIOM 1**

Dear Rog,

Thanks for the research material.

This may be of some help.

A.

NEW AXIOM 1

NEW AXIOM 1. LIFE IS BASICALLY AN EMANATION STEMMING FROM A LIFEFORCE PRESENCE

Definition: A Lifeforce Presence is pure Spirita it has no mass, no motion, no wavelength, no form, no limitation, no location in space or in time.

A Lifeforce Presence is infinite in depth, breadth, size and scope.

A Lifeforce Presence in its purest state is capable of infinite aliveness, infinite powers, infinite duplication, infinite permeation, infinite intelligence, infinite abilities, infinite cleverness, infinite strengths, infinite skills, infinite creation, infinite love, infinite truth, infinite harmony, infinite knowledge, infinite know-how, infinite responsibility, infinite control, infinite experience, infinite exchange and infinite integrity it should be noted that each one of these infinite capabilities also has no mass, no motion, no wavelength, no form, no limitation, no location in space or in time.

A Lifeforce Presence is in a state of oneness with all these capabilities.

A Lifeforce Presence is senior to all gradient scales and the mechanics of life.

A Lifeforce Presence has the ability to create and to perceive.

A Lifeforce Presence is the infinity of Spirita (8) that creates the containers of the becomingness

of the Infinity (of Spiritual Presence) to Zero of Spirit (8 to 0+) - to the Zero (of Spirit) to Infinity of Space, Time, Energy and Matter. $(-0 \text{ to } 8) = 8 - 8008$.

ALAN

OLD AXIOM 1. LIFE IS BASICALLY A STATIC.

Definition: A Life Static has no mass, no motion, no wavelength, no location in space or in time. It has the ability to postulate and to perceive.

I replied next day:

New Axiom 1---Something Omitted

Dear Alan,

I've been chewing on the New Axiom 1, and I do believe we have a very important item omitted. It is:

A Lifeforce Presence has infinite potential.

One could use the less familiar noun form, "potentiality." Good big dictionaries give wonderful expressions of what these concepts are in the context of an attribute of the state of existence of pure Spiritia.

This is a big concept. The stem word, of course is potent. And the original definition of it as an adjective is: that has power; potent. A modern adjective definition is: that can, but has not yet, come into being; possible; latent; unrealized; undeveloped; opposed to actual. The noun definition is: something potential; a potentiality. (These definitions from Webster's New Twentieth Century Dictionary, Unabridged Second Edition (Simon & Schuster.) A simple noun definition of it from The American Heritage Dictionary, Second College Edition, is: The inherent ability or capacity for growth, development, or coming into being.

I have for the last several months been processing in the area of this state of "ultimate, infinite potential/potentiality" and the what stemmed from it when, as a "Life-Force Presence of infinite potential," (and interestingly I did use those words to articulate the scenario in session) I and/or we acted to convert the potential to express actual states of Being or conditions of existence, and produced "things".

Hence my view that we need to add this concept to complete the full statement of New Axiom 1.

Rog

Alan did embrace my bright little contribution. In his lecture dated October 16, 2007, titled "**Life**" his opening dissertation about "*Life*" was all to do with this concept of its innate potential.

Proceeding from the experiences gained from the observations gained from discovering that “Life is Basically an Emanation Stemming from a Life Force Presence,” that is indeed a Spiritual Presence, the next series of experiential discoveries were as to the true extent of our existence and the sequences of our causative changes invoked during our existence.

As a result, we have observed a sequence of states of spiritual activity that declined from an Infinite Spiritual Presence to a state of Dottedness trapped at effect within the Physical Universe of our own creation.

Our observation is that the *series* of Conditions of Existence created by us during our decline from the Infinite Presence of Spiritia down to the fixidity of our present belief of being a physical existence, has been composed of a series of juxtaposed complementary existences.

Definition of Complement

noun

1. something that completes or makes perfect: *A good wine is a complement to a good meal.*
2. the quantity or amount that completes anything: *We now have a full complement of packers.*
3. either of two parts or things needed to complete the whole; [counterpart](#).

SEE MORE

verb (used with object)

4. to complete; form a complement to: *This belt complements the dress better than that one.*

Obsolete. to compliment

Observing the history of our existence, we observe there are always the existence of at least two complementary parts of existence. Example: a Causer and a Receiver; a Source and that which is produced by the action of being a Source; and in particular in the terms of locations spatially and temporally; “Here and There.”

Next Chapter . . .

How come we are in the mess that we are in?

+++++

THE MECHANICS OF MANIFESTING WHAT YOU ACTUALLY WANT

Believe it or not, there are some actual mechanics and vitally important principles that must be employed and practiced if you are to succeed at getting what you want in life.

Unless you know what these mechanics and principles are, life will simply be a sequence of involuntarily replicated fails.

And there is an exact sequence for the application of these principles if you are to succeed.

Point Zero: The Basis of it all. Knowing *that* you are, and *who* and *what* you are! As in what is your basic nature and what are your basic powers, abilities and capacities. It is to be noted and observed that if these Point Zero elements are not known they cannot be knowingly deployed or applied to positive effect . . . but, worse, they will likely be randomly empowered as unknowing involuntarily replicated chaos creating negatives (which is the reason folks find themselves having gotten in their own way, producing unwanted).

The First Causation Principle: creating the TIME of and through which your wanted item is to exist.

2nd principle: creating the SPACE of and in which your wanted item is to exist.

3rd principle is you, as a spiritual presence, knowingly holographically permeating and filling the created Time and Space with your presence and Life-Force.

4th principle is you applying and practicing the SPEIEPIR Creation Sequence to bring into being your wanted want(s).

It is to be noted that these items, Point Zero through to the completion of the SPEIEPIR Creation Sequence can go in so speedily as to appear as though one item was addressed, when in fact it might have been all eleven items. Most new folks to this technology do not know of nor have control of these factors, hence life and its game is out of their control.

But we each can be in precise control of these sequences of creation. All it takes is to carry out the relevant process of drilling each of elements to obtain the proper control . . . after all, this is what elite athletes do to give them the desired precise control of the component elements of their chosen sport.

Operating in the presence of the Physical Universe as we do, it is vitally important to get the above sequence right because it follows the sequence of our original causing of the current conditions of existence. To violate this sequence results in misalignment and collisions of Life-Force with the outcome of turbulence, mental masses and occlusion.

What is not known to humanity as we speak is the actual sequence of causations that produced our current condition of existence.

Physicists and society in general refer to *Space-Time*, but that is in error; the term should be *Time-Space* because that expresses the correct sequence of creation and order of importance.

Historically, the actual Conditions of Existence as amended and changed through time was as follows:

- 1) Our pure Native State as Spiritual Presences. This we refer to as The Supreme Beings Universe. This was a loving coexistence of all Beings in perfect alignment of all of their abilities, powers and faculties. This is the universe of nothing but pure Spiritual Presence

where we each deployed our Life Force for the benefit and pleasure of the union.

But it continued on too long with its same old, same old sameness to the extent it became painful . . . and this was solved by the “wrong answer solution” of what else could exist.

- 2) The Universal Visions. This is the action of creating ***Future Time*** in which new and different experiences could be manifested. But part of its error was that it was created to exist and continue on automatic continuum.
- 3) The Universal Mind. In due course our existence (Spiritual Presence) began to suffer from being junked up by the incessant creations of the Universal Visions continuum along with the accumulation of disharmonious creations within the union.

One of the Prime Abilities and Capacities of we Spiritual Beings is the ability to replicate and/or apperceive the emanations of others. It was practiced to perfection in the Supreme Beings Universe . . . in the Universal Mind this faculty performs as though a mirror of the Spiritual Presence, and thus holds the matrix of the holographic projections we now refer to as the Physical Universe.

- 4) The Spiritual Gods Games Universe is the universe where we all separated out from the unity of the of the prior co-existence, and hence created spatial “separation.”

The above is a very, very abbreviated rendition of the sequence of creations and changes to existence that brought into being our current state of existence.

Hence, I put it to you that by viewing what we have as “Space-Time” is a reversal of the actual state of existence . . . the temporal dimension was first created into which space was created and located.

As you all progress in your case processing and handling you will have the opportunity to process and experience the above directly.

For now, simply get your sequence of the steps of creation in the Physical Universe correct so that you don’t violate its basic sequence and cause it to “beef up.”

The SPEIEPIR sequence is its own wonderful formula and large subject I deal with in depth in its own dedicated write-up.

PS: How come the Einstein type geniuses got the sequence wrong?

Simple: they were addressing what resulted from the act of “creation” from the reverse direction . . . instead of looking at what now exists from the point of its prior being created to its outcome, they simply looked at the present time outcome, and collided with the later action of the sequence instead of getting the actual creation sequence and primacy of creations!

Space was created later and subsequent to time.

Let me know what you get out of this above ditty . . .

Rog

=====

Influence of others

Projection of envisioned image of your wanted want.

Because of its infiniteness it was not located. It was an infinite presence with omni-capabilities. It could create or uncreate at will. It always operated on the greatest good for all.

The departure from this universe came because it ceased to be wanted. Boredom set in and beings wanted change.

It separated into trillions of separate, supreme spirits. The end product of this was that all the attributes that composed and participated in achieving and maintaining this level of existence became LESS WANTED. In order to eliminate the boredom each being knowingly intended itself and others to lesser states.

Each supreme spirit left a part of itself as a guiding force. This higher self is what has guided the "descents" and is what is guiding the reclamation of mankind. This is primarily what is activating the "ascensionisms" that are now occurring at an increasing rate for selective spiritual individuals.

II. UNIVERSAL VISIONS: **This is a voluntary universe.**

This is the co-created visions of the Supreme Beings. What is envisioned are all of the lessons and knowledges necessary to create all of the sensations and problems that can be generated by random and uncoordinated input, intentions, and incorrect whos, whats, where, whens, hows, and inappropriate moods, to be able to override the destructive intent of evil individuals and groups and allow a group psychic program that will continuously return civilizations to higher levels. It is the collective imagery that spans the future direction and achievement of all spirits. The Universal Visions are the software that programs the Universal Mind.

The Universal Visions are the source of all fused imagery and all of today's universal realities. The Universal Visions preordained the future as it is now. The Universal Visions set the laws and standards and principles for all levels of existence. It allows all experience to be recorded fully and stored in the Universal Mind in mental and holographic format.

Contained in the Universal Visions are all formulation matrices of all examples of creation, including the Physical Universe and its balances and checks, forms, and all identity matrices. This includes the exact quantity of life-force particles to invest in the animation and form of those creations. The Universal Visions could be summed up best as the basic-basic patterning of all creations. **THE UNIVERSAL VISION CREATES THE VISUALS CONTAINED WITHIN AND OUTSIDE THE PHYSICAL UNIVERSE.**

The prime ability of All Knowing apparently was saved and served as the basic matrix of the UNIVERSAL MIND.

III. THE UNIVERSAL MIND: **It is being involuntarily replicated by the parts of ourselves that were left behind.**

This was an ability that was part of the heavens and was created as the composite first object and machine. Its purpose was to record all past and present events and contribute to all future events.

The Universal Mind has the ability to replicate every event and deed that ever occurred in time or space. In tandem with each individual's mind, these recordings can replicate and reproduce in full holographic, three dimensional, past, present, and future images that contain all exact perceptions and intentions.

It should be noted that THE UNIVERSAL MIND ACTS AS THE MIRROR OF THE SPIRIT AND IS THE HOLDER OF THE MATRIX THAT CREATES THE HOLOGRAPHIC TELEPATHIC PROJECTIONS KNOWN AS THE PHYSICAL UNIVERSE.

IV. THE SPIRITUAL GODS GAMES UNIVERSE: **This was a voluntary universe.**

The separation of the co-existent unity of THE HEAVENS into trillions of separate supreme, or god-like spirits led to the Spiritual Gods Games Universe.

This was a fun and excitement-filled universe that contained marvelous positive moods. The game started with each Supreme Spirit intending and visualizing elaborate creations that would amaze and enthrall other spirits. It required that each Supreme Spirit take part of itself to create force particles that were then molded into shapes, sensations, moods, and seductions.

The Supreme Spirit created the games and the beingness to play the games, and played with other Supreme Spirits in the formation of games. These games included the formation of beingness, doingness and ownerships, which could be created and vanished at will.

This was done in the following sequence:

a) SPIRITA: A specific quantity of whole free spirit that is not engaged in any perception, creation or action and that is free from the physical universe but is available as needed. A quantity of you.

Definition: META- prefix. Later in time or sequence; at a later stage of development, change, alteration or transformation.

b) METASPIRITA: Metaspirita is Spirita that is fractionated into trillions of pieces or bits. These are then created in the form of colored dots that contain either red, green or blue for use in the establishment of form or structure. This is accomplished by the use of stasis, vibration, electronics, heat, cold etc. to create differences in the pieces. These are in a state of constant creation and will cease to exist the instant they are no longer created.

This state creates the first vision.

c) METAMORPHOSED SPIRITA: This is Metaspirita that is further changed by adding a specific imprint (vision) by the Spirit to integrate and position the dots of red, green or blue into various colors that are modeled into particular forms, shapes, models, objects, particles, space and time. The Metamorphosed Spirita gains persistence by the use of opposing forces and dots. These opposing forces are held in place by the denial of the spirit that they created the opposition.

The vision is made more solid. This is self reality.

These Metamorphosed Spirita densified dots are the basic cornerstones of space, energy, particles and time. It is the Metamorphosed Spirita combined with the specific vision imprint impinged on the densified dots that are the basic information chips that are used to create the holograms we know as the mind, spiritual identities, and eventually, the physical universe. Further, the ability to perceive is the Metamorphosed Spirita's wavelength forms that allow contact and interplay between the Spirit and that which is being contacted, perceived and sent to the awareness of the Spirit.

Of course, the more each supreme spirit or god expanded this game and took on beingnesses the more the spirit tied up parts of itself.

To improve its ability to create, experience, and produce more potent creations and effects manifestations, the Supreme Spirit created a way to hold a position and be able to project its images to impress and fascinate others. This position-holding mechanism became the being's HOME UNIVERSE and introduced TIME, SPACE, and OBJECTS. **The Spiritual Gods Games Universe is being involuntarily replicated by the parts of ourselves that were left behind.**

V. HOME UNIVERSE: **This was an involuntary universe and is being involuntarily replicated by the parts of ourselves that were left behind.**

The purpose of this universe was to hold a position in space and be able to locate within and prevent outside intrusion, yet be able to operate externally to create and pleasure its fellow Supreme Spirits.

In order to create one's Home Universe, it was necessary to introduce compressed force particles in a basic cubic, eight-cornered pattern.

These eight compressed force particle patterns are known as the basic Home Universe Positionals.

From this Home Universe, the Supreme Spirit created its basic beingness. The Supreme Spirit had positioned itself in time and space and, by taking on a fixed beingness, lost a great deal of power and limited its mobility.

VI. THE EVIL BEING UNIVERSE: **This is voluntarily replicated by evil beings but involuntarily forced to participate by you.**

Note for new chapter . . .

THE INVOLUNTARY REPLICATION AT THE POINT OF HUMAN BODILY DEATH . . .

“GET OUT OF AND WAY FROM HERE - - - AT WHICH POINT “THE LIGHT’ TURNS ON.

August 18, 2023, 01:51:36 AM

This email exchange between me and Marcus Allen, a long term friend from the "OT Levels."

From: Roger Boswarva <.com>

Sent: Monday, August 14, 2023 6:49 PM

To: Marcus Allen <nexus.magazine@btconnect.com>

Subject: Viewing The Future

Hey Marcus. . .

I ran into a guy in the regular Wednesday discussion group of Scientific and Medical Network, by the name of Steve Begley who recognized your name when I mentioned it. Steve knows you from attending Nexus Conferences.

How it came about was I was relating to the group the story of my avoiding the 9:00am Glasgow Shuttle flight out of LHR back there in the 1970's as a result of perceiving the future of it NOT getting to Glasgow but instead coming down in some sort of emergency landing at 9:25am.

It was when I mentioned you phoning me at my office in London at around 10:00am that morning to tell me the news that I was right. The flight was diverted to Glamorganshire as a result of a lightning strike of workers in Scotland walking off the job at 9:25am (either traffic control or other airport workers).

I mentioned you by name and your position as publisher of Nexus Magazine in Europe; this in the context of demonstrating your credibility as a witness and to give Nexus a plug to the audience.

Steve is a huge fan of Nexus Magazine.

Rog

Marcus replied

To: Roger Boswarva <.com>

Subject: Re: Viewing The Future

Hi Rog,

I remember the event from the time it happened. I was amazed at your ability to know just how you could protect your life and body. That was a confirmation for me that such abilities could be developed and enhanced. A journey I have been on ever since...

I am so pleased you were able to foresee a life-changing event in sufficient detail to be here now. You are valued. We need you.

When Robin and I visited Australia back in 1994 to meet Duncan and ask him if we could distribute Nexus in the UK, he had previously spoken with Dennis Stevenson (Sandy's brother)

who related some of my history in Scn. Duncan said to me that as I had quite evidently survived and thrived having been 'declared' I was obviously the best person to take on Nexus. He was right...

Europe was added to our brief after the untimely illness suffered by Herman Hegge, who worked out of Amsterdam, forcing his retirement in around 2005.

Thank you for your mention of Nexus to the group, I hope it will have encouraged some to sample it. I have spoken at the S & M network meetings in London several years ago. I was, as you would expect, well received.

The Nexus Conferences which were held in Amsterdam were a great success and many people still mention them. I am so pleased Steve remembers them so fondly. When you next meet him, please remember me to him.

The new issue of Nexus has an excellent article by Bart Sibrel about the faked Moon Landings. There is a decreasing number of people who still believe it happened just the way NASA insists it did. Never mind, they can believe anything they want to, it does not mean it happened...

Take good care of yourself.

Love

Marcus

Perception of another and their thoughts/feeling across the distance Australia to New York.

This post I might just have easily put into the thread [Matching terminals & "masterpieces"](#).

But to be honest I am having so much case change and moving so fast, I have not yet settled on what the hell is happening 😊

As mentioned already, I have been working on cleaning up the “differences,” charge and degrees of upset Sweet V and I had hung up between us when she passed.

One of the problems encountered there has been the blocking effect of the enormous amount of pain-killing drugs V was on, not only in her final weeks when they were intensified under medical care, but the over the counter type she was maximizing in the final six months or more.

The drug effects did impede and block my ability to psychically access and move the charge . . . in any event progress was made.

You guys who have had me in sessions over Zoom know it is quite routine for good processors to be psychically aware of what the client is wrestling with . . . it is a capacity and ability you all should recognize and empower in yourselves and even more importantly, it has application outside of processing sessions!!

OK. Here is the real reason for this write-up!

On Saturday, August 28th, 2021, I found myself absolutely filled with an awareness of the presence of a girl (and a lovely, lovely beauty) I knew in 1960-61, and not been in touch with since.

The truth is, in those days 60+ years ago, I was a dumb horny young male, and one night I decided to descend on the young lady with amorous intent. We had met at the swim pool as a result of both being competitive swimmers.

The cuddling and kissing in her bedroom was wonderful, but “the event” was not “consummated” for two reasons: a) I did not want to risk or cause a pregnancy and, b) the lady did not signal consent.

Next night I returned with a gift of a white orchid as a symbol of the purity I saw the young lady to be. But she threw me off of the front door-step! Angrily not admitting me.

And that was the last contact and communication between us . . . 60+ years ago, till Saturday August 28.

The joker in the pack is that she is in Australia still, and I am in New York City, having lived around the world and now settled in New York.

The connection with the spiritual Life-Force presence of the girl throughout me and with me was so solid, I just *had* to act to find out what was what. I had to, for to not have sought the truth of this would have been a gross violation of the truth of an amazing event.

Fortunately, I had a clear recollection of the girl’s name. And hoped she had not changed it through marriage as many do.

I did a search for her name on Facebook . . . Bingo! There she was . . .

I sent her a message, basically apologizing for the upset I had caused her that many years ago.

This was the response:
Note she is in Oz, 15 hours ahead of New York time.

Hello Roger, how strange that you have found me after all those years. I am rather a gypsy and lived in England and Italy for many years and am now in Queensland. Tell me more about your work, it sounds profound. ***** (Signed name redacted).

By the way, over the week-end I was thinking about friends long ago and thought of you! A.

Apart from this being a rather magical experience, and quite empowering spiritually, today, still working with it and with sweet V, I got to wondering about some of the “mechanics” involved. Example, what is the answer to how this kind of perception can occur through brick walls and even right through the planet from one side of it to the other!! 😊

Part of the answer I am coming to that has further to be tested and refined, is that the Physical Universe is the product of our spiritual activity. The mechanical, physical universe is the result of directed, formed and applied spiritual Life-Force. . . . and hence, it is of us!

What is involved in our spanning through it to be aware of and/or perceive what is on the other side of it, I have not precisely seen yet . . . but the big answer I suspect is that, being the infinite spiritual presences that we are, the truth is that the physical universe is within us as a form of us . . . hence there is no physical barrier to our perceiving “what is *notionally* on the other side of it.”

But what we do know, is that ***“reality” as we have it is the outcome of telepathically projected imagery that has been fused by agreement.***

So our spiritual Life-Force faculties not locked up in the fusing of those realities is obviously free to do its usual.

I’d like to hear of any insight you clever folks come up with.

Rog

The scientists keep trying to explain “everything” in physical universe terms instead of recognizing the source of what is to be spiritual and to then, thus explain the PU in alignment with and to the spiritual.

In other words, they are reversing the order of importance and sequence.
